## Drink Water Campaign

**03.11.2016**

Drink Water Campaign took place in our school on Thursday the third of November. Erasmus+ students encouraged their peers as well as their teachers to drink tap water. Not only did they talk about the necessity of drinking water and the quality of tap water in Gdańsk, but also they served tap water to students and teachers in a school hall. The water was delicious with a slice of lemon or orange, with a leaf of mint. Many of us drank the water and was truly surprised how good it tastes.

The campaign was conducted in cooperation with SAUR NEPTUN GDAŃSK , which supplies water to citizens and enterprises in Gdańsk. The company also supervises monitoring of water quality in Gdańsk District.

The campaign is integral part of Erasmus+ project "Poszukiwanie skarbu -Treasure Hunt", which stresses the importance of water in our lives.
